INVITATION TO PAY ADDITIONAL FEES

(PCT Article 17(3)(a) and Rule 40.1)

Date of mailing (day/month/year) 19/08/2005	
Applicant's or agent's file reference 78.636/Pt KOT	PAYMENT DUE within ONE MONTH from the above date of mailing
International application No. PCT/HU2004/000055	International filing date (day/month/year) 20/05/2004
Applicant AMT ADVANCED MULTIMEDIA TECHNOLOGY AB	

1. This International Searching Authority

- (i) considers that there are 7 (number of) inventions claimed in the international application covered by the claims indicated ~~below~~ on the extra sheet:

and it considers that the international application does not comply with the requirements of unity of invention (Rules 13.1, 13.2 and 13.3) for the reasons indicated ~~below~~ on the extra sheet:

- (ii) ☒ has carried out a partial international search (see Annex) ☐ will establish the international search report on those parts of the international application which relate to the invention first mentioned in claims Nos.:
see annex

- (iii) will establish the international search report on the other parts of the international application only if, and to the extent to which, additional fees are paid

2. The applicant is hereby invited, within the time limit indicated above, to pay the amount indicated below:

EUR 1.550,00 x 6 = EUR 9.300
Fee per additional invention number of additional inventions total amount of additional fees

Or, _____ x _____ = _____

The applicant is informed that, according to Rule 40.2(c), the payment of any additional fee may be made under protest, i.e., a reasoned statement to the effect that the international application complies with the requirement of unity of invention or that the amount of the required additional fee is excessive.

3. ☐ Claim(s) Nos. _____ have been found to be unsearchable under Article 17(2)(b) because of defects under Article 17(2)(a) and therefore have not been included with any invention.

Annex to Form PCT/ISA/206
COMMUNICATION RELATING TO THE RESULTS
OF THE PARTIAL INTERNATIONAL SEARCH

International Application No

PCT/HU2004/000055

1. The present communication is an Annex to the invitation to pay additional fees (Form PCT/ISA/206). It shows the results of the international search established on the parts of the international application which relate to the invention first mentioned in claims Nos.:

see 'Invitation to pay additional fees'

2. This communication is not the international search report which will be established according to Article 18 and Rule 43.

3. If the applicant does not pay any additional search fees, the information appearing in this communication will be considered as the result of the international search and will be included as such in the international search report.

4. If the applicant pays additional fees, the international search report will contain both the information appearing in this communication and the results of the international search on other parts of the international application for which such fees will have been paid.

INVITATION TO PAY ADDITIONAL FEES

International application No.

PCT/HU2004/000055

This International Searching Authority found multiple (groups of) inventions in this international application, as follows:

1. claims: 1-6, depending claims 8, 9, 10, 13 and corresponding claims 57-60

coding method with reduced block partition information

2. claim: 7

coding method with selective use of Hadamard transform

3. claims: 11, 12

coding method with block subdivision criteria

4. claims: 14-22

coding method with quantization depending on block size and available bandwidth

5. claims: 23-34

coding method with improved motion compensation

6. claims: 35-43

coding method with improved arithmetic coder

7. claims: 44-56

coding method with improved neural network controlled quantiser

1.1. The document XP002338961 (D1) discloses claim 1 (the comments in parentheses referring to this document):

"Method for compressing a digitally coded video frame sequence, comprising the steps of

a) dividing a given frame into blocks, (p.1046, section 4.1, title "intra prediction with variable block sizes)

b) optionally, further dividing individual blocks into smaller blocks, (idem)

c) modifying the information content of selected blocks relying on information contained in a neighbouring block or blocks (prediction), (idem)

d) generating transformed blocks by carrying out on the selected blocks: a transformation (DCT) that converts spatial representation into

INVITATION TO PAY ADDITIONAL FEES

International application No.

PCT/HU2004/000055

frequency representation (idem, its is implicit that a time-frequency transform is performed) and finally

e) encoding the information content of the transformed blocks by entropy coding (implicit, the H.26L coder uses entropy coding, see also p. 1043, section 2.5)

characterised by that

i) compressibility analysis is performed on said selected blocks before carrying out the transformation specified in step d, and, depending on the result of the analysis (p. 1047, 1st par., prediction mode and macroblock selection)

ii) steps c, (prediction) and d, (DCI) are carried out on the block (p.1047, 1st par., "the best prediction mode is selected" and "the best mode is selected", in the last excerpt, macroblock mode is meant)

iii) optionally, the block is further partitioned into sub-blocks, and the compressibility analysis specified in step i, is performed again on the blocks resulting from individual partitioning (p. 1047, 1st par., all macroblock modes, i.e. partitions, and all prediction modes are tested), and

iv) the block partitioning that will potentially yield the best results is chosen relying on results given by steps i and iii, (p. 1047, 1st par., "the best prediction mode is selected") and finally

v) the transformation specified in step d, is carried out using the block partitioning with the best potential results, relying on the prediction specified in step c.(p.1047, 1st par. , 1.4, "The best mode is then used for encoding")"

Note : The term "optionally" in the claim makes even a simple intraframe coding method novelty destroying for claim 1.

Claim 2 is disclosed by the word SATD on p.1047, since SATD is indicative of the content of a block.

Claim 3 is disclosed by the word SATD on p.1047, and p.1041, section 2.1, which gives an explanation of SATD.

Claim 6 is also disclosed by D1.

Claim 4,8 and 13 are trivial and will be added for simplicity reasons to the first (searched) group of inventions. The additional subject-matter of claim 9 is disclosed on p.1047.

1.2 Therefore, the special technical features (STF) of the different group of inventions depending on claim 1 are :

1) Claim 5: encoding the specific data representing the block partitioning and claim 10 : "occurrence count of individual block sizes..."

2) Claim 7: DCT is applied on blocks smaller than 16x16, Hadamard is applied on blocks with a size of 16x16

3) Claim 11: subdivision depending on error

Although dependencies between claims 5, 7, and 11, i.e. claim combinations exist where one claim is depending from the other, these combination claims are juxtapositions of the different STF's since these STF's solve different objective problems. Therefore, the different claims are considered for the search as if they were independent of each other.

1.3. The objective problems by the STF are the following:

- 1) reducing the partitioning information
- 2) speedup of block transformation

INVITATION TO PAY ADDITIONAL FEES

International application No.

PCT/HU2004/000055

3) efficient image content partitioning

1.4. Independent claims 14, 23, 35 and 44 are also non-unitary with the former claims. Having regard to D1, their respective STF's are :

- 4) see application p.74, 1:10-13
- 5) see application p.76, 1.6-1.12
- 6) see application p.78, 1. 15-25
- 7) see application p. 80, 1. 4-5

1.5. These STF solve following objective problems :

- 4) quantizing independent of variable block size
- 5) simplifying motion vector search (see descr., p. 37, 1.4-9)
- 6) improving the probe algorithm (see descr., p. 50, 1. 15)
- 7) improvement of bandwidth regulation (descr. p. 58, 1.11)

Note : In cases 6) and 7), it is noted that neural networks are known techniques for improving arithmetic coding and quantisation. See also description p. 52, first 2 lines.

1.6. The STF's of the 7 groups of inventions are not the same and are not corresponding, since they each solve different problems. Consequently, the different groups of inventions are not linked by an inventive concept. Therefore, these group of inventions are non-unitary contrary to Rule 13 PCT.

1.7. The application relates to a plurality of inventions, or groups of inventions, in the sense of Rule 13.1 PCT. They have been divided as defined above. If the applicant pays additional fees for one (or more) not yet searched group(s) of invention(s), then the further search(es) may reveal further prior art that gives evidence of a further lack of unity 'a posteriori' within one (or more) of the not yet searched group(s). This is particularly the case for the group of inventions 5, 6, and 7, respectively related to claims 23, 35 and 44, having regard to the number and structure of the dependent claims. In such a case only the first invention in this (each of these) group(s) of inventions, which is considered to lack unity of invention, will be the subject of a search. No further invitation to pay further additional fees will be issued. This is because Article 17(3)(a) PCT stipulates that the ISA shall establish the International Search Report on those parts of the international application which relate to the invention first mentioned in the claims ('main invention') and for those parts which relate to inventions in respect of which the additional fees were paid. Neither the PCT nor the PCT guidelines provide a legal basis for further invitations to pay further additional search fees (W17/00, point 11 and W1/97, points 11-16).

AMT ADVANCED MULTIMEDIA TECHNOLOGY AB

1. The applicant is hereby notified that this International Preliminary Examining Authority considers the following date as the date of receipt of the demand for international preliminary examination of the international application:

14/12/2004

2. This date of receipt is:

- ☒ the actual date of receipt of the demand by this Authority (Rule 61.1(b)).
☐ the actual date of receipt of the demand on behalf of this Authority (Rule 59.3(e)).
☐ the date on which this Authority has, in response to the invitation to correct defects in the demand (Form PCT/IPEA/404), received the required corrections.

3. ☐ **ATTENTION:** That date of receipt is after the expiration of 19 months from the priority date. Consequently, in respect of some Offices, the demand does not have the effect of postponing the entry into the national phase until 30 months from the priority date (or later in some Offices) (Article 39(1)) and the acts for entry into the national phase must therefore be performed within 20 months from the priority date (or later in some Offices). However, in respect of some other Offices, the time limit of 30 months (or later) may nevertheless apply. See the Annex to Form PCT/IB/301 and, for details about the applicable time limits, Office by Office, see the *PCT Applicant's Guide*, Volume II, National Chapters and the WIPO Internet site.

- ☐ (If applicable) This notification confirms the information given by telephone, facsimile transmission or in person on:

4. Only where paragraph 3 applies, a copy of this notification has been sent to the International Bureau.

Box No. V DESIGNATIONS

The filing of this request constitutes under Rule 4.9(a), the designation of all Contracting States bound by the PCT on the international filing date, for the grant of every kind of protection available and, where applicable, for the grant of both regional and national patents.

However,

- ☐ DE Germany is not designated for any kind of national protection
- ☐ KR Republic of Korea is not designated for any kind of national protection
- ☐ RU Russian Federation is not designated for any kind of national protection

(The check-boxes above may be used to exclude (irrevocably) the designations concerned in order to avoid the ceasing of the effect, under the national law, of an earlier national application from which priority is claimed. See the Notes to Box No. V as to the consequences of such national law provisions in these and certain other States.)

Box No. VI PRIORITY CLAIM

The priority of the following earlier application(s) is hereby claimed:

item (3)				

☐ Further priority claims are indicated in the Supplemental Box.

The receiving Office is requested to prepare and transmit to the International Bureau a certified copy of the earlier application(s) (only if the earlier application was filed with the Office which for the purposes of this international application is the receiving Office) identified above as:

☐ all items ☒ item (1) ☐ item (2) ☐ item (3) ☐ other, see Supplemental Box

* Where the earlier application is an ARIPO application, indicate at least one country party to the Paris Convention for the Protection of Industrial Property or one Member of the World Trade Organization for which that earlier application was filed (Rule 4.10(b)(ii)):

Box No. VIII (iv) DECLARATION: INVENTORSHIP (only for the purposes of the designation of the United States of America)
The declaration must conform to the following standardized wording provided for in Section 214; see Notes to Boxes Nos. VIII, VIII (i) to (v) (in general) and the specific Notes to Box No. VIII (iv). If this Box is not used, this sheet should not be included in the request.

**Declaration of inventorship (Rules 4.17(iv) and 51bis.1(a)(iv))
 for the purposes of the designation of the United States of America:**

I hereby declare that I believe I am the original, first and sole (if only one inventor is listed below) or joint (if more than one inventor is listed below) inventor of the subject matter which is claimed and for which a patent is sought.

This declaration is directed to the international application of which it forms a part (if filing declaration with application).

This declaration is directed to international application No. PCT/..... (if furnishing declaration pursuant to Rule 26ter).

I hereby declare that my residence, mailing address, and citizenship are as stated next to my name.

I hereby state that I have reviewed and understand the contents of the above-identified international application, including the claims of said application. I have identified in the request of said application, in compliance with PCT Rule 4.10, any claim to foreign priority, and I have identified below, under the heading "Prior Applications," by application number, country or Member of the World Trade Organization, day, month and year of filing, any application for a patent or inventor's certificate filed in a country other than the United States of America, including any PCT international application designating at least one country other than the United States of America, having a filing date before that of the application on which foreign priority is claimed.

Prior Applications: 20.05.2003 - P0301368.(HU)

I hereby acknowledge the duty to disclose information that is known by me to be material to patentability as defined by 37 C.F.R. § 1.56, including for continuation-in-part applications, material information which became available between the filing date of the prior application and the PCT international filing date of the continuation-in-part application.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
